A CRM APPLICATION FOR THE CHAI SHOP & CO

User Story:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.

I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions. Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions.

Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development. Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations

- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Sales Representative	Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	Stressed and inefficient
PS-2	Store Manager	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied
PS-3	Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	Disconnected and undervalued

Problem Statements – TheChaiShop&Co CRM Application					
PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Stressed and inefficient 
PS-2		Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied 
PS-3	 Customer	Receive personalized offers and updates	I do not get timely notifications 	There is no automated communication	Disconnected and undervalued 

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate customer data and reports
Hear	Feedback from management

See	Multiple registers and spreadsheets
Say & Do	Enter data manually
Pain	Errors, delays, data loss
Gain	Automation, fast reports

2.3 Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM
- Salesforce-based CRM
- Automated email system

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Access CRM Application
- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports

- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login
FR-2	Object Creation
FR-3	Data Entry
FR-4	Billing Automation

FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements NFR-1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements :

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help.

Salesforce Lightning UI provides drag-and-drop features and easy navigation.

NFR-2: Security

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
 - Secure login authentication
 - Encrypted data storage
 - Data backup and recovery
- Examples:**
- Profiles and permission sets
 - Object-level and field-level security
 - Restricted billing access
 - Secure login and password policies

NFR-3: Reliability

The CRM system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example :

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay

Example: When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability
- Minimal downtime

- Cloud-based hosting
- Disaster recovery

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6: Scalability

The system should support business growth without affecting performance.

Requirements:

- Ability to handle more users
- Support increasing customer data
- Expandable storage
- Maintain system speed

Example: If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down. Salesforce infrastructure automatically scales.

3.3 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards.

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

4.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.
Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details.
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows.
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.

Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.
Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.
User Role Management	Controls system access using profiles and permission sets for different users.

4.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- The project followed an Agile-based development approach with defined milestones and sprints.
- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.

WPS Office

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Member1
Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Member2

Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Member3
----------	---------------	-------	--	---	------	---------

- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications.
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

WPS Office

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Member4
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Modeling	USN-6	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	5	High	Member2
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Member3
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Member1
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Member2
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions.	4	High	Member3
Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Member4

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

6. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Global Picklist

Milestone 6 : Fields and Relationships

Milestone 7 : Creation of Page Layout

Milestone 8 : Creation of Record Types

Milestone 9 : Validation rules

Milestone 10 : Email Templates

Milestone 11 : Flows

Milestone 12 : Reports and Dashboards

Milestone 13 : Conclusion

What you'll learn

1. Real Time Salesforce Project
2. Standard and Custom objects

3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation :

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup> 2.

On the sign up form, enter the following details :

Build enterprise-quality apps fast to bring your ideas to life

- Build apps fast with drag and drop tools
- Customize your data model with clicks
- Go further with Apex code
- Integrate with anything using powerful APIs
- Stay protected with enterprise grade security
- Customize UI with clicks or any leading-edge web framework

Sign up for your Salesforce Developer Edition
A full-featured copy of the Platform, for free

Complete the form to start your free trial. Our team will be in touch to help you make the most of your trial.

First Name*
Your first name

Last Name*
Your last name

Email*
Your email address

Role*
Your job role

Company*
Company Name

- 1) First name & Last name
- 2) Email
- 3) Role : Developer
- 4) Company : College or Company Name
- 5) Country : India

6) Postal Code : pin code

7) Username : should be a combination of your name and company

This need not be an actual email id, you can give anything in that format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for **lead@sb.com**.
Make sure to include at least:

- 8 characters
- 1 letter
- 1 number

* New Password

* Confirm New Password

Security Question
In what city were you born?

* Answer
asdfghjkl

Change Password

- Then you will redirect to your salesforce setup page.

Milestone 2 - Objects

- In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - **Label** : Employer Account
 - **Plural Label** : Employer Accounts
 - Enter Record Name Label and Format
Record Name : Employer Account Name
Data Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
 - **Search Status** : check the box for Allow Search.
 - Save

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - **Label** : Customer Account
 - **Plural Label** : Customer Accounts
 - Enter Record Name Label and Format
Record Name : Customer Account Name
Data Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
 - **Search Status** : check the box for Allow Search.
 - Save

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.
 - **Label** : Enterprise Account
 - **Plural Label** : Enterprise Accounts
 - Enter Record Name Label and Format
Record Name : Enterprise Account Name Data
Type : Text
 - **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
 - **Search Status** : check the box for Allow Search.
 - Save

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search "app manager" in quick find → select "app manager" → click on New lightning App.

6. To Add User Profiles : System Administrator

7. Click Save & Finish.

Milestone 5 : Global Picklist

Activity 1 : Create Global Picklist

1. In Quick find box search for : Picklist value sets and click New.

- **Label :** Gender
Name : Auto Populates
Values : Male
 Female
 Others Click
Save & New.

2. Create three more Global picklists following the same steps.

- **Label :** Items **Name :** Auto populates
Values : Platinum Tea Powder
 Double Delight Tea Powder
 Super Dust Tea Powder
 Osmania Biscuits (Value Pack)
 Osmania Biscuits (Premium Pack)
 Dry Fruit Biscuits
 Fruit Biscuits
 Salt Biscuits
 Multigrain Biscuits

Ragi Biscuits
 Double Choco Chip Cookies
 Butter Almond Cookies
 Melting Moments Cookies
 Honey Oats Cookies
 Delight Box
 Signature Box
 Assorted Box

Click **Save & New**.

- **Label** : Payment Mode
Name : Auto populates
Values : Gpay
 PhonePe
 Paytm
 Credit or Debit card
 Cash.
 Click **Save & New**.

- **Label** : Type of Items
Name : Auto populates
Values : Tea powder
 Cookies
 Gift Hampers
 Click **Save**.

Picklist Value Sets

[Help for this Page](#)

Global picklist value sets let you share the values across objects. Base custom picklist fields on a global value set to inherit its values. The value set is restricted so users can't add unapproved values through the API.

View: [All](#) [Create New Value](#)

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z Other [All](#)

Global Value Sets			New
Action	Label	Description	
Edit Delete	Gender		
Edit Delete	Items		
Edit Delete	Payment Mode		
Edit Delete	Type of Items		

Milestone 6 : Fields & Relationships

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Employer Account**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

Fields & Relationships
20 items, Sorted by Field Label

Q Quick Find New Deleted Fields Field Dependencies Set History Tracking

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLING FIELD	INDEXED
Account Entity Name	Name	Text(50)		✓
Address	Address_c	Text(100)		

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

Step 3: Enter the details Step 3 of 4

Also add to custom report type ☒ Add this field to existing custom report types that contain this entity

Formula Return Type

☐ None Selected Select one of the data types below

☐ Checkbox Calculate a boolean value.
Example: `{TODAY()} <= CloseDate`

☐ Currency Calculate a dollar or other currency amount and automatically format the field as a currency amount.
Example: `GrossMarginAmount / Cost`

☐ Date Calculate a date, for example, by adding or subtracting days to other dates.
Example: `ReleaseDate + CloseDate - 7`

☐ DateTime Calculate a datetime, for example, by adding a number of hours or days to another datetime.
Example: `ReleaseDate + 1`

☒ Number Calculate a numeric value.
Example: `Fahrenheit * 1.8 / Celsius + 32`

☐ Percentage Calculate a percentage and automatically add the percent sign to the number.
Example: `Discount * (Amount - DiscountedAmount) / Amount`

☐ Text Create a text string, for example, by concatenating other text fields.
Example: `Field Name 1 & " " & Field Name 2`

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts
Online orders and Walk-In orders.

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

Create New Page Layout

As an option, you may select an existing layout to clone. If you create a page layout without cloning, your page layout will not include the standard sections whose names are translated for your international users.

Existing Page Layout: None

Page Layout Name: Online Orders

 Active : Tick the checkbox

Click Next

New Record Type
Customer Account

Help for this Page

Step 1. Enter the details Step 1 of 2

Enter a name and description for the new record type. The new record type will include all the picklist values from the existing record type selected below. After saving the new record type, you will be able to customize the picklist values.

Record Type Required Information

Existing Record Type: -Master-

Record Type Label: Online Order

Record Type Name: Online_Order

Description:

Action

Select Make Available to give users assigned to this profile the ability to create and clone records of this record type, or assign this record type to existing records. To make the new record type the default for a profile, select Make Default. Users assigned to this record type can still view and edit records associated with record types not available for their profiles.

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Online orders** from the drop down menu.

Select the page layout that users with this profile see for records with this record type. After saving, choose the picklist values that are available with this record type.

☒ Apply one layout to all profiles Online Orders

☐ Apply a different layout for each profile

5. Click **Save and New**.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master

Record Type Label : Walk-In Order

Record Type Name : Auto Populates

Active : Tick the checkbox

Click Next

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Walk-In orders** from the drop down menu.

5. Click **Save**.

Milestone 9 - Validation Rules

Activity 1: On Employer Account

1. Go to the setup page → click on object manager → From drop down click edit for **Employer Account** object.
2. Click on the validation rule → click New.

The screenshot shows the 'Validation Rules' configuration page for the 'Employer Account' object. On the left, a sidebar lists various setup options, with 'Validation Rules' highlighted. The main area displays a table of existing rules:

RULE NAME	ERROR LOCATION	ERROR MESSAGE	ACTIVE	MODIFIED BY
Aadhar_Number	Top of Page	Aadhar number is required. Aadhar number must be 12 digits long. Aadhar number can only contain numeric digits. Aadhar number never starts with 0.	✓	Sohan Gup, 10/04/2024, 2:43 pm
RAI_Number	Top of Page	The RAI Details field must not be blank. The RAI card number does not start with 0. The RAI card number does not contain special characters.	✓	Sohan Gup, 10/04/2024, 3:10 pm
Phone_Number	Top of Page	The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.).	✓	Sohan Gup, 10/04/2024, 2:54 pm

A 'New' button is visible in the top right corner of the table area.

3. Enter Rule Name : Aadhar Number Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Aadhar_Number__c )),  
  LEN( Aadhar_Number__c ) <> 12,  
  NOT(REGEX( Aadhar_Number__c , "[1-9]{12}$"))  
)
```

The screenshot shows the 'Validation Rule Edit' dialog box. The 'Rule Name' is 'Aadhar_Number'. The 'Active' checkbox is checked. The 'Error Condition Formula' is entered as follows:

```
AND(  
  NOT (ISBLANK( Aadhar_Number__c )),  
  LEN ( Aadhar_Number__c ) <> 12,  
  NOT (REGEX ( Aadhar_Number__c , "[1-9]{12}$"))  
)
```

The 'Check Syntax' button shows 'No errors found'. A 'Functions' list is visible on the right, including ABS, ACOS, ADDMONTHS, AND, ASCII, and ASIN.

4. **Error Message** : Aadhar number is required.
The Aadhar number must be 12 digits long.
Aadhar number can only contain numeric digits.
Aadhar number never starts with 0

5. Click **Save & New**.

Error Message

Example: Discount percent cannot exceed 30%

This message will appear when Error Condition formula is **true**

Error Message

Aadhar number is required.
The Aadhar number must be 12 digits long.
Aadhar number can only contain numeric digits.
Aadhar number never starts with 0.

This error message can either appear at the top of the page or below a specific field on the page

Error Location ☒ Top of Page ☐ Field 

6. Repeat the same steps and create two more validation rules on the employer account object.

- **Enter Rule Name** : PAN Number **Error**

Condition Formula :

```
AND(  
    NOT(ISBLANK( Phone_Number__c )),  
    NOT(REGEX( Phone_Number__c , "^[1-9]{10}$")),  
    NOT(REGEX( Phone_Number__c , "^\\d+$"))  
)
```

Error Message : The PAN Details field must not be blank.
The PAN card number does not start with 0.
The PAN card number does not contain special characters.

Click **Save & New**.

- **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(  
    NOT(ISBLANK( Phone_Number__c )),
```

```
NOT(REGEX( Phone_Number__c , "[1-9]{10}$")),  
NOT(REGEX( Phone_Number__c , "^\\d+$"))  
)
```

Error Message :

The phone number field must not be blank.

The phone number must consist of exactly 10 digits.

The phone number must contain only numeric digits

(no spaces, dashes, parentheses, etc.)

Click **Save**.

Activity 2: On Customer Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the validation rule → click New.
3. **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(  
NOT(ISBLANK( Phone_Number__c )),  
NOT(REGEX( Phone_Number__c , "[1-9]{10}$")),  
NOT(REGEX( Phone_Number__c , "^\\d+$"))  
)
```

Error Message :

The phone number field must not be blank.

The phone number must consist of exactly 10 digits.

The phone number must contain only numeric digits

(no spaces, dashes, parentheses, etc.)

4. Click **Save**.

Activity 3: On Enterprise Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.

2. Click on the validation rule → click New.

3. **Enter Rule Name** : Phone Number

Error Condition Formula :

```
AND(  
  NOT(ISBLANK( Phone_Number__c )),  
  NOT(REGEX( Phone_Number__c , "[1-9]{10}$")),  
  NOT(REGEX( Phone_Number__c , "^\\d+$"))  
)
```

Error Message :

The phone number field must not be blank.
The phone number must consist of exactly 10 digits.
The phone number must contain only numeric digits
(no spaces, dashes, parentheses, etc.)

4. Click **Save**.

Milestone 10 - Email Template

Activity 1: Email Template

1. Go to setup, In quick find box enter Email template → click on classic Email Template.
2. Click on→ New Email Template
3. Choose the type of email template you would like to create : **Text** and click **Next**.

The screenshot shows the Salesforce Classic Email Templates setup page. The left sidebar has a search bar with 'Email template' entered. The 'Email' menu is expanded, and 'Classic Email Templates' is selected. The main content area is titled 'Unfiled Public Classic Email Templates' and shows a table of available templates. A 'New Template' button is visible at the top of the table.

Action	Email Template Name	Template Type	Available For Use	Description	Author	Last Modified Date
View	Appointment for Unaffiliated User using Appointment Channel For Amazon China	Custom	✓	Email template for confirmation of an appointment when appointments are scheduled using appointment types with Amazon China.	admin@org	10/04/2024

9. Click **Add**.

10. Repeat the same steps for the Enterprise Account Sales Report.
11. Click **Save**.

Milestone 12 - Conclusion

In conclusion, the development of TheChaiShop&Co CRM application marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities. Seamlessly integrating employer details,

customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making. The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning interface to verify correct system behavior. These include:

- Record creation for Employer, Customer, and Enterprise objects
- Validation rule testing for Aadhar, PAN, and phone numbers
- Verification of record types and page layouts
- Formula field validation for order quantity and billing
- Flow execution for birthday email alerts
- Report and dashboard generation

Performance testing ensured fast response time and system stability during concurrent usage.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data management
- Reduced manual work
- Automated calculations
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

9. Conclusion:

The CRM Application for TheChaiShop&Co successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting. The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

10. FUTURE SCOPE

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts
- Inventory management
- Multi-branch support
- Advanced customer profiling
